JIM CORBETT NATIONAL PARK
2 NIGHTS / 3 DAYS

Nestled in the foothills of the Himalayas, Jim Corbett National Park is a diverse wilderness of dense sal forests, open grasslands, river valleys and wooded hills. The park is renowned for its thriving population of Bengal tigers, while its varied habitats also support Asian elephants, leopards, spotted deer, sambar, wild boar, Himalayan black bears and numerous species of birds. The Ramganga River and its surrounding landscapes add to the character of Corbett, creating important habitats for both wildlife and birdlife.

Tour Highlights

- Four exciting jeep safaris in Jim Corbett National Park
- Immersive experiences amidst pristine forest landscapes
- Rich birdwatching opportunities
- Scenic nature photography opportunities

Itinerary

Day 1: Arrival and Evening Safari
Arrive in Corbett around 1 PM, proceed to the resort and check-in. Enjoy lunch and some time to settle in before heading out for an evening safari. Later, return to the resort for dinner and a comfortable night's sleep.

Day 2: Morning and Evening Safaris
Begin the day with an early morning safari, followed by breakfast and leisure time at the resort.
After lunch, head out for an evening safari. Return to the resort for dinner and a good night's sleep.

Day 3: Morning Safari and Departure
Begin the day with a morning safari, followed by breakfast.
Check out by 10:30 AM and depart from Corbett, taking with you wonderful memories of your wildlife experience.

Weather

Winter (October–February): Winter brings cool mornings, crisp air and pleasant daytime conditions to Jim Corbett National Park. Temperatures generally range from around 5°C to 25°C, with early morning safari drives often feeling quite cold. The relatively dry conditions and comfortable weather make this a popular period for wildlife viewing, birdwatching and photography. Carry warm clothing such as a fleece jacket, sweater, thermal layers and a scarf, particularly for morning safaris.
Summer (March–June): Summer becomes increasingly warm, with daytime temperatures often reaching 30°C–40°C, especially during April and May. As temperatures rise, wildlife can frequently be seen near the Ramganga River, streams and waterholes, particularly during the early morning and later hours of the day. The drier forest can also provide better visibility in some areas. For summer safaris, choose light cotton clothing, and carry a hat, sunglasses, sunscreen and adequate drinking water. Early morning safaris are generally more comfortable before the heat intensifies.

Best Season for Wildlife

November to June is an excellent time to explore Jim Corbett National Park, offering opportunities to spot tigers, elephants, leopards, deer and diverse birdlife.
November to February brings pleasant weather and excellent birdwatching, while March to June is particularly rewarding for wildlife sightings as animals frequent water sources.
